

The hysteroscopic workshops organized by Hospital del Mar - Parc de Salut Mar is a practical training course for specialists in obstetrics and gynecology.

Previous experience in diagnostic hysteroscopy is needed for only practice participants.

The practice participants will be able to make real practice in Laser hysteroscopy surgeries, guided by an international expert .

We have chosen International Experts in Diode laser and 12 different patients, with different pathologies.

Each participant will have the opportunity to train in 2 procedures.

The attendants without training will take part of surgeries and discussions from the conference room in a very interactive session.

During the lunch break, all the participants will be able to discuss the different technics with the experts.

Program:
